

Avalanche Control /

TURRET /

The TURRET is designed to be used as a rotating support for the AVALAUNCHER.

Specifications /

The TURRET offers the possibility to change the shooting angle, initially at 45°.

- Reduced angle for more accurate shots.
- Increased angle for steep shots.
- A stainless-steel plate graduated on 360° allows the marking of directions for each referenced shooting point.

The TURRET ideally complements the AVALAUNCHER by increasing its range of action and enhancing the ballistic performance of the EXPLOSIVE ARROW.

- AVALAUNCHER base height : 0.90 m
- Weight : 180 kg
- Dimensions : 95 x 75 x 95 cm
- Shooting angles : Mini = 25° / Maxi = 55°
